                  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               274.2

The present sequence is useful for producing transgenic plants having altered levels of sphingolipid desaturase which in turn would alter the fatty acid composition. The enzyme is also useful for producing polyclonal or monoclonal antibodies. The polymucleotide is useful as primer or probe for screening CDNA libraries to

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present sequence is a sphingolipid desaturase from clone ssl.pk0017.b4:fis isolated from soybean seedling cDNA library, ssl. The present sequence is useful for producing transgenic plants having altered levels of sphingolipid desaturase which in turn would alter the fatty acid composition. The enzyme is also useful for producing polyclonal or monoclonal antibodies. The polyuncleotide is useful as primer or probe for screening cDNA libraries to isolate desired full-length cDNA clones.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Polynucleotide encoding delta-6 desaturase enzyme useful transgenic plants and for producing antibodies specific useful for screening cDNA expression libraries
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence
